Grade 9 at Westgate CVI | 2023-24

Students with Parents/Guardians determine compulsory course type during Grade 9 Registration in February.

Mathematics - Academic (Pre-AP)	MTW1WA	Science - Destreamed	SNC1W1
Mathematics - Destreamed	MTW1W1	Science - Locally Developed	SNC1L1
Mathematics - Locally Developed	MAT1L1	French - Academic	FSF1D1
English - Academic (Pre-AP)	ENG1DA	Geography - Academic	CGC1D1
English - Academic	ENG1D1	Health and Physical Education - Open	PPL1O1
English - Locally Developed	ENG1L1	FNMI Languages - Open	LNOA01
Science - Academic (Pre-AP)	SNC1WA		

Students with Parents/Guardians will select two (2) electives. A third choice will be indicated on the Welcome to Grade 9 form as a record for us in the event that a student's timetable does not allow for the first two choices.

General Learning Strategies in Numeracy	GLS101
Music - Band	AMI101
Music - Guitar	AMG101
Visual Arts	AVI101

WESTGATE

COLLEGIATE AND VOCATIONAL INSTITUTE

Academics

We offer innovative programs to suit a wide variety of students drawn from both the city and rural areas. Caring and committed staff provide students with opportunities to earn their compulsory and elective credits at the essential, open, applied, and academic levels in courses like Art, Business, Canadian and World Studies, Computer Studies, English, FNMI Language, French, Guidance and Career Education, Health and Physical Education, Mathematics, Science, Social Science and Technology. For those seeking greater academic challenge we offer courses in English, Math, and Science at the Pre-Advanced Placement and Advanced Placement Levels. See Page 3 for more information.

Academic and Cultural Support for First Nation, Metis and Inuit Students

Westgate is fortunate to have a Four Directions Program that includes Graduation Coaching, a Learning Lodge with an Aboriginal Achievement Tutor and the Biwaase'aa program. All of these programs offer academic and social support combined with opportunities that enhance the students' cultural, mental, physical and emotional well-being.

Special Education

Westgate is proud to be a school that values inclusion and celebrates individual strengths and differences. Westgate offers a school-based program combined with Pre-Workplace, Special Needs and Multi-Needs programs – the widest range of special education opportunities in the city. Contact our Special Education Manager for more information.

Arts Education

We are proud of the comprehensive arts programming offered at Westgate: dance, drama, fashion, guitar, music, stage band, visual arts and vocal training. Major productions including musicals, art exhibits at the Thunder Bay Art Gallery, dance performances and music concerts all offer our students the opportunity to shine.

Technological Education

The technological education program at Westgate, with state of the art equipment and facilities, equips our students to meet the challenges and the opportunities of the future. Beginning with Exploring Technologies, we design and create products with a wide variety of industry-standard tools, equipment and software. A pathway to further technology courses is clear with courses in Construction, Green Industries, Design, Manufacturing and Transportation starting in Grade 10. Building on prior skills and knowledge, students become technologically literate and are able to make solid decisions about their future.

Specialist High Skills Major Programs

For our senior students (Grades 11 and 12), Westgate is proud to offer Specialist High Skills Major programming in six distinct areas: Arts and Culture, Aviation and Aerospace, Business combined with an Aboriginal Youth Entrepreneurship Program, Hospitality with a culinary focus, Manufacturing and Transportation Service. Specialist High Skills Major Programs allow students to focus on a career pathway that matches their interests while meeting the requirements of the Ontario Secondary School Diploma. Students in these programs receive specialized training and certifications as well as a host of other benefits. Speak to Student Services for more information about the six amazing opportunities offered through Westgate in Specialist High Skills Major Programs.

Athletics

From championship teams to intramural pick-up games at lunch, Westgate offers a full array of athletic opportunities. Our positive sportsmanship at Westgate means that many students participate and our teams bring home trophies! Check out football, basketball, curling, cheerleading, wrestling, track and field, volleyball and more by coming to try-outs!

Students' Council

Westgate's SAC is one of the largest and the best in the city! Throughout the year, SAC plans exciting events for the student body including Spirit Weeks, Pep Rallies, Corn Roasts, Semi-Formal Dinner Dances and more. In addition, SAC actively supports local charities like the United Way and Christmas Cheer by hosting events to raise funds at school. All are welcome – join to make friends, develop your leadership skills and make a difference at Westgate!

IT'S MY TIME TO BE A
Westgate Tiger

AP ADVANCED PLACEMENT

Challenge Yourself!

What is AP?

AP is an enriched academic program where students have the flexibility to take one or all of the AP courses offered at Westgate CVI (with recognized standardized testing during your senior year).

Advanced Placement is a program that offers students the opportunity to participate in a more challenging academic program whose ultimate goal is to give students the option to take standardized Advanced Placement exams in Grade 12. Depending on the results and the university, students may receive advanced standing or university credit in first year.

The AP Examinations

Students in AP courses do not have to take the exams. The AP Examinations have no bearing on the students' marks in the course. They are an opportunity for students to measure themselves against the best students in those subjects worldwide and, as noted above, to potentially receive university credits while still in high school.

What is Pre-AP

At Westgate, students can opt to take their Pre-AP 9-11 Mathematics, Science and English credits at the AP level (ENG1DA rather than ENG 1D1, for example).

These courses, in addition to covering The Ontario Curriculum, will be enriched academic courses with the goal of exposing students to the vocabulary and style of AP examinations. It should be noted that students will be evaluated in exactly the same way as students in the regular academic stream; the expectations are not greater. The difference is that students will encounter more sophisticated content. These courses will naturally lead to Grade 12 AP courses, at the end of which the students will have the option of writing the AP Examinations, which occur in May each year.

While we encourage students interested in this avenue to take Pre-AP beginning in Grade 9, students may still opt for AP courses in Grades 11 and 12 without having taken Pre-AP provided they have demonstrated an appropriate aptitude for the particular subject.

Why Take AP?

Advanced Placement courses customize learning tailored to your academic strengths. The program is an excellent preparation for post-secondary (university) education, and you will be studying with other, like-minded students. All teachers are AP trained and certified, and are specialists in their respective subjects.

AP English

- Engage in rich course material, classroom discussion, and unique assignments to help develop the knowledge and critical thinking skills needed for post secondary studies;
- Take part in the rigorous study of a variety of texts from the 1600's to the present, providing an opportunity for developing knowledge through inquiry, communication, and collaboration; and
- Learn to write essays using the style and form appropriate for the demands of university courses.

AP Mathematics

- Earn potential university credit while in high school;
- Expose yourself to the rigour of university Calculus;
- Learn and graduate with like-minded, academically motivated students; and
- Develop the work ethic, problem solving and critical thinking skills necessary for success at the university level.

AP Biology

- Earn potential university credit while in high school;
- Participate in more sophisticated and complex inquiry lab activities; and
- Develop and refine analytical and mathematical skills and their applications.

Is AP Right for Me?

Are you:

- an independent and motivated learner with a strong work ethic?
- an avid reader and effective communicator?
- a strong critical and creative thinker who enjoys solving problems and analyzing how things work?
- curious about the world around you and eager to challenge yourself to expand your learning at Westgate?

If you perform at a high level in Mathematics, Science, History, Geography and Language, like to read, are willing to problem solve, and seek challenges, Pre-Advanced Placement and Advanced Placement (AP) just might be for you.

SELECTION & PLANNING

Diplomas and Certificates

Ontario Secondary School Diploma (OSSD)

In order to earn an Ontario Secondary School Diploma (OSSD), a student must earn a minimum of 30 credits accumulated as follows:

18 Compulsory Credits

- 4 credits in English (1 per Grade)*
- 3 credits in Mathematics (at least 1 in Gr 11 or 12)
- 2 credits in Science
- 1 credit in the Arts**
- 1 credit in Canadian Geography (Gr 9)
- 1 credit in Canadian History (Gr 10)
- 1 credit in French as a Second Language or Native Language***
- 1 credit in Health and Physical Education
- 0.5 credit in Career Studies
- 0.5 credit in Civics

3 additional credits, consisting of 1 credit from each of the following groups:

Group 1 - English (including the Ontario Secondary School Literacy Course), French as a second language, American Sign Language as a second language, classical languages, international languages, Native languages, Canadian and world studies, FNMI studies, social sciences and humanities, guidance and career education, cooperative education.

Group 2 - French as a second language, American Sign Language as a second Language, the arts, business studies, health and physical education, cooperative education.

Group 3 - French as a second language, science (Grade 11 or 12), computer studies, American Sign language as a second language, technological education, cooperative education.

The following conditions apply to selections from the above three groups: A maximum of 2 credits in French as a second language may count as additional compulsory credits, 1 credit from Group 1, and 1 credit from either Group 2 or 3.

A maximum of 2 credits in cooperative education may count as additional compulsory credits, selected from any of Groups 1, 2, or 3.

12 elective credits

40 hours of community involvement activities

Ontario Secondary School Literacy Requirement

* The Ontario Secondary School Literacy Course (OSSLC) may be used to meet either the Grade 11 or 12 English compulsory credit requirement. The Grade 11 Understanding First Nation, Métis, and Inuit Voices course may be used to meet the Grade 11 English compulsory credit requirement. For English language learners, the requirement may be met through earning a maximum of 3 credits in English as a second language (ESL) or English Literacy Development (ELD); the fourth must be a Grade 12 compulsory English course.

** The Grade 9 Expressing Aboriginal Cultures course may be used to meet the compulsory credit requirement in the arts.

*** Students who have taken Native languages in the place of French as a second language in elementary school may use a Level 1 or 2 Native language course to meet the compulsory credit requirement for French as a second language.

Online learning graduation requirement

Beginning with students that entered Grade 9 in 2020-21 school year, students must earn at least two online learning credits to get their Ontario Secondary School Diploma.

The online learning requirement also applies to adult learners that will be entering the Ontario secondary school system starting 2023-24 school year.

Credits earned during COVID-19

Students can count one secondary school credit that was earned during the province wide school closures (from April 2021 to June 2021) towards the two online credits that they need to graduate. This applies to all Grade 9 students who were learning remotely due to province wide school closures.

Opting out

Parents who wish to opt out or exempt their child from the online graduation requirement must complete the opt-out form available from their child's school board. Exemption from the online learning graduation requirements may be requested by:

- the parent or guardian of the secondary student
- Students who are 18 years of age or older
- Students who are 16 or 17 years of age and have withdrawn from parental control

What is an Individual Education Plan?

An Individual Education Plan is a written plan that describes the special education program and/or services required by a particular student. It may identify accommodations, modified learning expectations and/or alternative learning expectations.

Ontario Secondary School Certificate (OSSC)

In order to earn an Ontario Secondary School Certificate (OSSC), a student must achieve 14 credits distributed as follows:

Compulsory Credits

- 2 credits in English
- 1 credit in Canadian Geography or Canadian History
- 1 credit in Mathematics
- 1 credit in Science
- 1 credit in Health & Physical Education
- 1 credit in the Arts or Technological Education

Elective Credits

7 credits selected by the student from available courses

Certificate of Accomplishment

Students who leave school before fulfilling the requirements for the Ontario Secondary School diploma or the Ontario Secondary School Certificate may be granted a Certificate of Accomplishment. The Certificate of Accomplishment may be a useful means of recognizing achievement for students who plan to take certain vocational programs (i.e. March of Dimes) or other kinds of further training, or who plan to find employment after leaving school.

XELLO

Xello is the web-based planner you will use to manage your IPP. It is also the course selection tool that will help you set up your high school courses in alignment with your graduation requirements and career goals.

Your Individual Pathways Plan (IPP)

All Ontario secondary students will create their own Individual Pathways Plan (IPP). This is the primary planning tool that you will use as you move through school to your initial post-secondary destination.

Your Individual Pathways Plan (IPP) will help you find the answers.

Everything you learn about courses, careers and pathways will be stored in your IPP. You will be able to access all this valuable information as you begin planning your life after high school.

A career is your path through life.

In high school, you will have to make decisions about education, learning, different jobs, work (paid and unpaid), family life, friendships, community involvement and leisure activities.

Career development requires you to understand who you are and what opportunities you have in both the world and the workplace, so that you can begin to make decisions about your future. Career development involves understanding your own strengths and interests, goal-setting, decision-making and awareness of opportunities.

Jobs in the future will belong to people with skills, attitudes and behaviours that include academic abilities, personal management skills and teamwork strategies.

You will need to have good work habits and the ability to make sound decisions, solve problems, plan effectively, work independently, communicate well, do research, evaluate yourself realistically, and explore new educational and career opportunities.

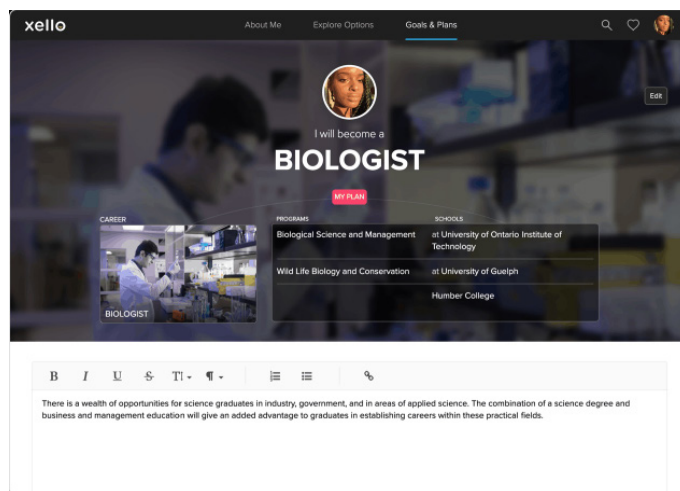

Student Services Guidance Counsellors will be a valuable resource for searches, course selection, career exploration, support and so much more. Talk to your counsellor about your ideas, goals, and dreams.

Explore Options, Goals & Plans

Use this walkthrough to learn about Explore Options and Goals & Plans. These activities help students open their eyes to the many different futures available to them. Once they've been introduced to the wide range of careers, have delved into self-knowledge, and have defined a goal, Xello prompts them to come full circle and narrow the pathways required to reach those future goals.

Explore Options

Whether you want to start your journey by exploring careers, schools, or majors, you can start from Explore Options. Let's start with Careers.

Explore Careers

- Select *Explore Options* in the top menu.
- Select *Careers* and you'll see your top 20 best-matched careers. By default, careers are sorted by the strength of your match to the career: Excellent, Good, Fair, or Poor.
- Browse through the list and select *View More* to see another 20 careers. You can keep expanding the list.

TIP: Explore the dynamic filters by clicking *More Filters*. You can narrow your list based on factors like earnings, related clusters, and job outlook.

Deep Dive on a Career

Xello includes hundreds of career profiles that are accessible and engaging. To view a career profile, select a career that interests you. Select *Find Out Why* to see how the answers you gave in your assessments contributed to your match score.

Select *Save* next to the heart icon to save a favourite career, indicate how you feel about it, and explore further with investigative prompts.

Make your way to the bottom of the career profile page, scrolling past the job description, earnings, and down to the education and training; you'll see a list of links under *Related Programs*. Choose one to take you to *Explore Programs*.

TIP: Saving your options will help you experience a curated Xello journey as activities are specially tuned to your interests and favourites. You can visit your saved options from any page by clicking the heart icon in the top menu bar.

Explore Programs

Once on the *Explore Programs* page, the link you chose from the career profile will be applied as a filter to the program results. Apply other filters to further narrow results.

Time to Explore!

Choose a program to bring up its profile. On each program you will see details such as admission requirements, costs, and similar programs, at this and other schools. From the right of the profile, select *Save* to record it to your favourites.

TIP: You can access Programs and Schools from the top of any page.

Explore Schools

To explore more about the specific school, select the school name under the section titled *Offered By*. From here you can learn about cost, enrollment, programs, campus housing, similar schools, and even the local weather, and an interactive campus map. Select *Save* to record it to your favourites.

Xello works hard to prompt you to discover a path that parallels your skills and interests, but sometimes your best inspiration will be stumbled upon by surprise. So if you'd like to cut loose and browse all careers, schools, and programs, select the *Explore Options* link again and select the appropriate section to begin exploring, applying filters, and saving your favourites.

Goals & Plans

Once you've explored your career, program, and school options, bring your knowledge full circle and build a plan to connect all the dots. From the navigation bar at the top of the page, select *Goals & Plans* and then *Create Plan*.

Choose one of the three starting points: career, school, or program; and give your plan a name. Select *Next* and use your saved options to choose a path in your future.

Once completed, you can personalize your plan by adding comments and media to your storyboard. Create multiple plans and compare them on the Goals & Plans page.

Stay up-to-date on everything that's happening at school with Edsby. Edsby is an online learning management system that connects students, parents and teachers. Login to Edsby to stay up to date on classwork, grades and learning resources. Edsby will even remind you when something is due - whether it is to hand in an assignment, or to go to soccer practice.

Use your Office ID to login to Edsby at lakehead.edsby.com or download the Edsby app from your app store.

Need2Know

Current Grade 9s

For Grade 10, you will have five compulsory courses plus three electives.

Current Grade 10s

You will take an English and a Math course, plus six other elective credits. You should be considering your Groups 1, 2, and 3, as well as prerequisites you may be required to take in Grade 12 for Apprenticeship, College or University programs after high school.

Current Grade 11s

You are choosing your one English and at least five other courses. You must ensure you will graduate with a minimum of 30 credits including 18 compulsory credits.

If you have attempted the Ontario Secondary School Literacy Test at least twice and have been unsuccessful, you should include OLC40 as a course choice.

Please note: If you received 50% in a course, you should talk to your subject teacher about the appropriate next step.

Students wishing to attend college or university are reminded that they must meet specific entrance requirements:

University – at least six (6) Grade 12 “U” or “M” courses and in many cases a designated overall average (70% for Lakehead University).

Students must also meet courses prerequisites for certain post secondary programs.

For a comprehensive list of Universities and programs, as well as prerequisites and admissions requirements, visit: www.ontariouniversitiesinfo.ca

College – at least Grade 12, College English. Specific senior mathematics courses are also required for technology programs.

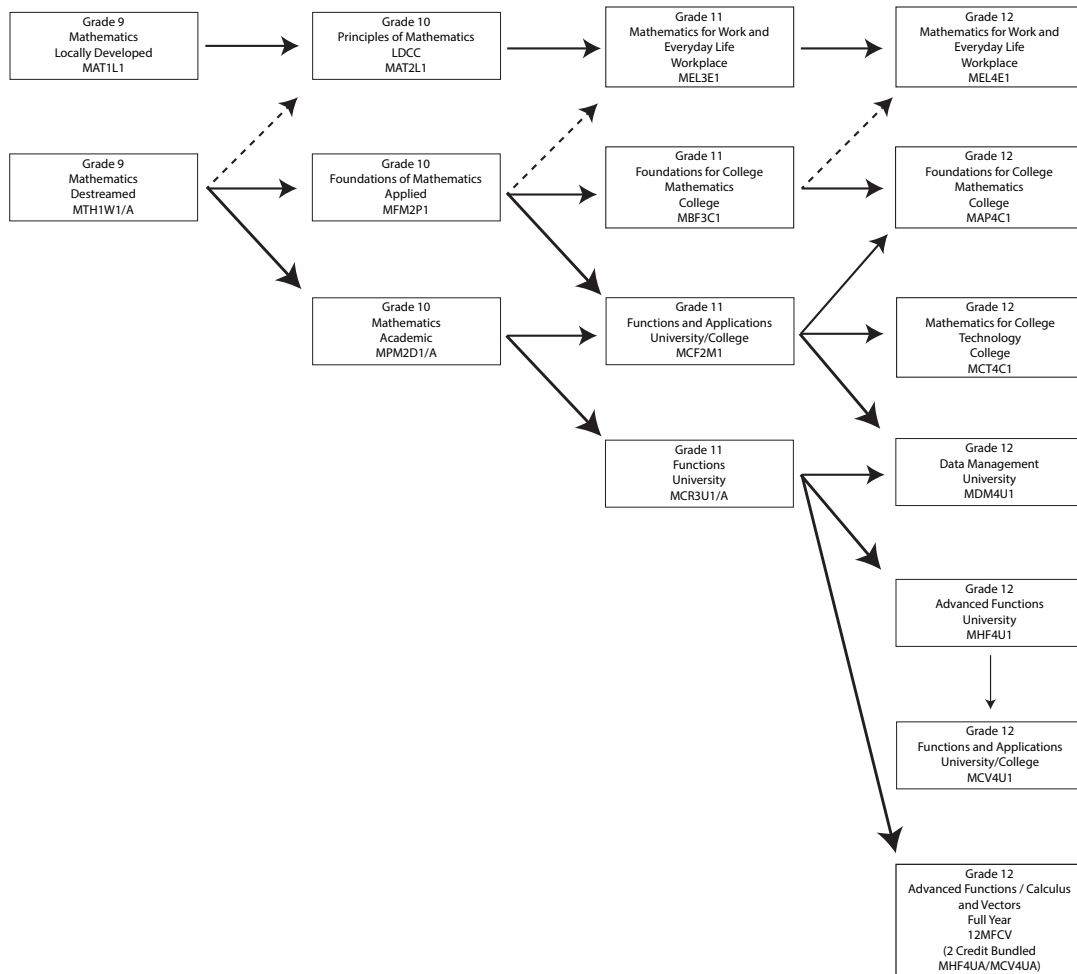

To explore college programs and admissions requirements, visit: www.ontariocolleges.ca

For more information on trades, visit: www.skilledtrades.ca

Students are reminded that it may be difficult or impossible to change a course once school starts in September.

Course selections made in February for the following year are the basis upon which classes are structured and staff is assigned. After staffing and the school's master timetable are established, subsequent changes in a student's program are possible but very much restricted, and are considered if timetable and class size permit.

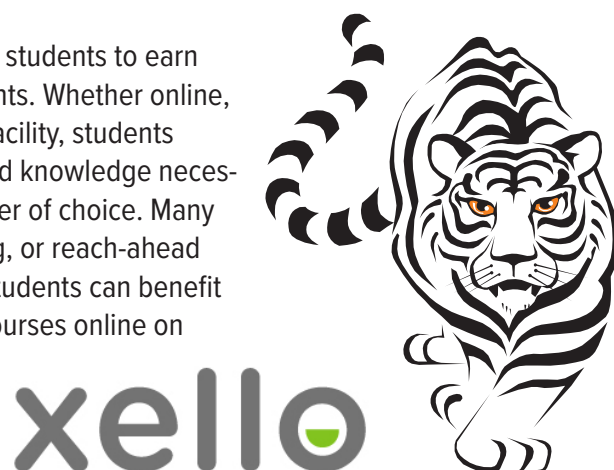

Where enrolment is insufficient, a course may be canceled.

Innovative, exciting and flexible opportunities are available that allow students to earn credits towards their diploma in many unique and varying environments. Whether online, in a career setting, post-secondary institution, or other educational facility, students participating in these programs work hands-on and build the skills and knowledge necessary to ensure their successful transition to their post-secondary career of choice. Many of these programs also provide free certifications, recognized training, or reach-ahead experiences to help students further focus their career pathway. All students can benefit from participation in these equal access programs. Students select courses online on Xello during February.

COURSE DESCRIPTIONS

The Arts

Dance

Dance
Grade 10

This course emphasizes the development of students' technique and creative skills relating to the elements of dance and the tools of composition in a variety of performance situations. Students will identify responsible personal and interpersonal practices related to dance processes and production, and will apply technologies and techniques throughout the process of creation to develop artistic scope in the dance arts.

Prerequisite: None

ATC201
Open

Dance
Grade 11

This course emphasizes the development of students' artistry, improvisational and compositional skills, and technical proficiency in dance genres from around the world. Students will apply dance elements, techniques, and tools in a variety of ways, including performance situations; describe and model responsible practices related to the dance environment; and reflect on how the study of dance affects personal and artistic development.

Prerequisite: ATC101 or ATC201

ATC3M1
University/College

Dance
Grade 12

This course emphasizes the development of students' technical proficiency, fluency in the language of movement in global dance genres, and understanding of the dance sciences. Students will explain the social, cultural, and historical contexts of dance; apply the creative process through the art of dance in a variety of ways; and exhibit an understanding of the purpose and possibilities of continuing engagement in the arts as a lifelong learner.

Prerequisite: ATC3M1

ATC4M1
University/College

Drama

Drama
Grade 10

This course provides opportunities for students to explore dramatic forms, conventions, and techniques. Students will explore a variety of dramatic sources from various cultures and representing a range of genres. Students will use the elements of drama in creating and communicating through dramatic works. Students will assume responsibility for decisions made in the creative and collaborative processes and will reflect on their experiences.

Prerequisite: None

ADA201
Open

Drama
Grade 11

This course requires students to create and perform in dramatic presentations. Students will analyze, interpret, and perform dramatic works from various cultures and time periods. Students will research various acting styles and conventions that could be used in their presentations, and analyze the functions of playwrights, directors, actors, designers, technicians, and audiences.

Prerequisite: ADA101 or ADA201

ADA3M1
University/College

Drama
Grade 12

This course requires students to experiment individually and collaboratively with forms and conventions of both drama and theatre from various cultures and time periods. Students will interpret dramatic literature and other text and media sources while learning about various theories of directing and acting. Students will examine the significance of dramatic arts in various cultures, and will analyze how the knowledge and skills developed in drama are related to their personal skills, social awareness, and goals beyond secondary school.

Prerequisite: ADA3M1

ADA4M1
University/College

Music

Music - Strings
Grade 10

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities and cultures.

Prerequisite: None

AMS201
Open

Music - Instrumental
Grade 10

This course emphasizes the creation and performance of music at a level consistent with previous experience. Students will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. Students will develop their understanding of musical conventions, practices, and terminology and apply the elements of music in a range of activities. They will also explore the function of music in society with reference to the self, communities, and cultures.

Prerequisite: None

AMI201
Open

The course description above applies to the following with the addition of a greater concentration in the area noted.

Music - Guitar
Grade 10

This is a first year Guitar course.

AMG201
Open

Music - Vocal/Choral
Grade 10

AMV201
Open

Music - Instrumental
Grade 11

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analysing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers.

Prerequisite: AMI101 or AMI201 or AMI10K

AMI3M1
University/College

The course description above applies to the following with the addition of a greater concentration in the area noted.

Music Repertoire - Stage Band*
Grade 11

Prerequisite: AMI101 or AMI201 or AMI10K

** This course will run outside of school hours to be determined*

AMR3M1
University/College

Music - Guitar
Grade 11

Prerequisite: AMG201 or AMG101 or AMI10K

AMG301
Open

Music - Strings
Grade 11

Prerequisite: AMS201

AMS301
Open

Music - Instrumental

Grade 12

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyze how to apply skills developed in music to their life and careers.

Prerequisite: AMI3M1 or AMI3O1

AMI4M1

University/College

The course description above applies to the following with the addition of a greater concentration in the area noted.

Music - Guitar

Grade 12

Prerequisite: AMG3O1

AMG4M1

University/College

Music - Repertoire - Stage Band *

Grade 12

Prerequisite: AMR3M1 or AMI3M1

* This course will run outside of school hours to be determined

AMR4M1

University/College

Music - Guitar

Grade 12

This course provides students with the fundamental knowledge and skills needed to succeed in the music workplace. Students will, at a level consistent with previous experience, perform appropriate musical works. Independently and collaboratively, students will use current technology and the creative and critical analysis processes to plan, produce, and market music presentations that reflect a broad spectrum of workplace contexts. In addition, students will explore ethical and safe practices related to music.

Prerequisite: AMG3O1

AMU4E1

Workplace

Visual Arts

Visual Arts

Grade 10

This course enables students to develop their skills in producing and presenting art by introducing them to new ideas, materials, and processes for artistic exploration and experimentation. Students will apply the elements and principles of design when exploring the creative process. Students will use the critical analysis process to reflect on and interpret art within a personal, contemporary, and historical context.

Prerequisite: None

AVI2O1

Open

Visual Arts

Grade 11

This course enables students to further develop their knowledge and skills in visual arts. Students will use the creative process to explore a wide range of themes through studio work that may include drawing, painting, sculpting, and printmaking, as well as the creation of collage, multimedia works, and works using emergent technologies. Students will use the critical analysis process when evaluating their own work and the work of others. The course may be delivered as a comprehensive program or through a program focused on a particular art form (e.g. photography, video, computer graphics, information design).

Prerequisite: AVI1O1 or AVI2O1

AVI3M1

University/College

Visual Arts

Grade 11

This course focuses on studio activities in the visual arts, such as drawing, painting, sculpture, photography, printmaking, collage, and/or multimedia art. Students will use the creative process to create art works that reflect a wide range of subjects and will evaluate works using the critical analysis process. Students will also explore works of art within a personal, contemporary, historical, and cultural context.

Prerequisite: AVI1O1 or AVI2O1

AVI3O1

Open

Visual Arts

Grade 12

This course focuses on enabling students to refine their use of the creative process when creating and presenting two- and three-dimensional art works using a variety of traditional and emerging media and technologies. Students will use the critical analysis process to deconstruct art works and explore connections between art and society. The studio program enables students to explore a range of materials, processes, and techniques that can be applied in their own art production. Students will also make connections between various works of art in personal, contemporary, historical, and cultural contexts.

Prerequisite: AVI3M1 or AVI3O1

AVI4M1

University/College

Visual Arts

Grade 12

This course focuses on a practical approach to a variety of art and design projects related to the workplace. Students will use the creative process to produce a traditional and/or digital portfolio of their work in a variety of media. Students may focus on various aspects of visual arts, including advertising, ceramics, fashion design, graphic arts, jewelry design, and/or web design.

Prerequisite: AVI3O1

AVI4E1

Workplace

Business Studies

Business

Introduction to Business

Grade 10

This introductory business course allows students to utilize real life game simulations to help them develop an understanding of the functions of business, including: accounting, marketing, business technology, entrepreneurship, human resources, and production. Types of game simulations used include: Monopoly, running a virtual business, stock market contests, and running a real-life business at school. This course builds a foundation for further studies into our booming Specialist High Skills Major Business program at Westgate and helps students develop the business knowledge they will need in their everyday lives.

Prerequisite: None

BBI2O0

Open

Accounting

Financial Accounting Fundamentals

Grade 11

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and current issues and ethics in accounting.

Prerequisite: None

BAF3M1

University/College

Financial Accounting Principles

Grade 12

This course introduces students to advanced accounting principles that will prepare them for postsecondary studies in business. Students will learn about financial statements for various forms of business ownership and how those statements are interpreted in making business decisions. This course expands students' knowledge of sources of financing, further develops accounting methods for assets, and introduces accounting for partnerships and corporations.

Prerequisite: BAF3M1

BAT4M1

University/College

International Business

International Business Fundamentals

Grade 12

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for post secondary programs in business, including international business, marketing, and management.

Prerequisite: None

BBB4M1

University/College

Marketing

Marketing: Goods, Services, Events

Grade 11

BMI3C1

College

This course introduces the fundamental concepts of marketing, which includes the marketing of goods, services, and events. Students will examine how trends, issues, global economic changes, and information technology influence consumer buying habits. Students will engage in marketing research, develop marketing strategies, and produce a marketing plan for a product of their choice.

Prerequisite: None

Marketing: Retail and Service

Grade 11

BMX3E1

Workplace

This course focuses on marketing activities in the retail and service sectors. Students will examine trends and global influences on marketing decisions, and will learn about the importance of customer service in developing a customer base and maintaining customer loyalty. Through hands-on learning, students will develop personal selling and information technology skills that will prepare them for a variety of marketing-related positions in the workplace.

Prerequisite: None

Sports and Entertainment Marketing

Grade 12

IDC4U1

University

This university course is designed for students interested in sports, entertainment, and event marketing. Emphasis is placed on the following principals as they apply to the industry: fantasy sports, event marketing, sponsorship, promotions, implementation of sports / entertainment marketing plans, branding, licensing, and naming rights, endorsements, business foundations and event management techniques. This interdisciplinary course also emphasizes the development of practical skills and knowledge in order to solve problems, make decisions, create personal meaning, and present findings related to the growth of the sports and entertainment industry. Students will research, analyze, and investigate how music, dance, sports, arts and/or fashion can facilitate changes in community, societal, and cultural values.

Prerequisite: Any university or university/college preparation course.

Business Leadership

Business Leadership Management

Grade 12 - eLearning

BOH4ME

University/College

This course focuses on the development of leadership skills used in managing a successful business. Students will analyze the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized.

Prerequisite: None

Yearbook

Designing the Yearbook

Grade 11

IDC3O1

Open

This course enables students to develop media knowledge and skills while designing and producing the school yearbook and other projects in the area of graphic communications. Students will work both independently and as a part of a team learning the basics of journalism, layout and design, photography, publishing, marketing, and advertising through the production of the school yearbook and other print and electronic materials. Classroom activities will be closely related to the real world of interviewing, photographing, meeting deadlines, and producing both paper and online publications. **This class has both e-learning and in-person components. In person attendance is required at least once a week during lunch. The course runs for the entire school year. Please see Ms. Johnston if you have any questions.** **Prerequisite: None**

Canadian and World Studies

Civics (Politics)

Civics & Citizenship (0.5 Credit)

Grade 10

CHV2O5

Open

This course explores rights and responsibilities associated with being an active citizen in a democratic society. Students will explore issues of civic importance such as healthy schools, community planning, environmental responsibility, and the influence of social media, while developing their understanding of the role of civic engagement and of political processes in the local, national, and/or global community. Students will apply the concepts of political thinking and the political inquiry process to investigate, and express informed opinions about, a range of political issues and developments that are both of significance in today's world and of personal interest to them.

Prerequisite: None

Civics & Citizenship (0.5 Credit) - eLearning

Grade 10

CHV2OE

Open

Prerequisite: None

Geography

Travel and Tourism: A Geographic Perspective

Grade 11

CGG3O1

Open

This course focuses on issues related to travel and tourism within and between various regions of the world. Students will investigate unique environmental, sociocultural, economic, and political characteristics of selected world regions. They will explore travel patterns and trends as well as tensions related to tourism, and will predict future tourism destinations. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate the impact of the travel industry on natural environments and human communities.

Prerequisite: CGC1P1 or CGC1D1

World Issues: A Geographic Analysis

Grade 12

CGW4U1

University

This course looks at the global challenge of creating a more sustainable and equitable world. Students will explore a range of issues involving environmental, economic, social, and geopolitical interrelationships, and will examine governmental policies related to these issues. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate these complex issues, including their impact on natural and human communities around the world.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

The Environment and Resource Management - eLearning

Grade 12

CGR4ME

College

This course investigates interactions between natural and human systems, with a particular emphasis on the impacts of human activity on ecosystems and natural processes. Students will use the geographic inquiry process, apply the concepts of geographic thinking, and employ a variety of spatial skills and technologies to analyze these impacts and propose ways of reducing them. In the course of their investigations, they will assess resource management and sustainability practices, as well as related government policies and international accords. They will also consider questions of individual responsibility and environmental stewardship as they explore ways of developing a more sustainable relationship with the environment.

Prerequisite: Any university, university/college, or college preparation course in Canadian and world studies, English, or social sciences and humanities

History

First Nations, Métis, and Inuit Peoples in Canada

Grade 10

NAC2O1*

Open

This course explores First Nations, Métis, and Inuit peoples' relationships with Canada from pre-contact to the 21st century. Students will examine social, economic, political and military interactions that impact the contemporary realities of Aboriginal people in Canada in relation to identity, culture, community, land, and governance. Students will explore their own and others' ideas using the historical inquiry process to think critically and respond responsibly about civic questions raised today as a result of the changing relationships.

Prerequisite: None

** Credit may be used to meet the Grade 10 compulsory History credit requirement. See Student Services.*

Canadian History Since World War I Grade 10

This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

Prerequisite: None

CHC2D1 Academic

Canadian History Since World War I Grade 10

This course focuses on the social context of historical developments and events and how they have affected the lives of people in Canada since 1914. Students will explore interactions between various communities in Canada as well as contributions of individuals and groups to Canadian heritage and identity. Students will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating the continuing relevance of historical developments and how they have helped shape communities in present-day Canada.

Prerequisite: None

CHC2P1 Applied

Canadian History Since World War I Grade 10

This course focuses on the connections between the student and key people, events and themes in Canadian contemporary studies. Students prepare for the grade 11 Canadian and World Studies Workplace Preparation course through the development and extension of historical literacy skills and critical thinking skills. Students explore a variety of topics highlighting individuals and events that have contributed to the story of Canada. The major themes of Canadian identity, internal and external relationships and changes since 1914 are explored through guided investigation. Students have the opportunity to extend analytical skills with a focus on identifying and interpreting events and perspectives and making connections. Students practice reading, writing, visual, and oral literacy skills to identify and communicate ideas in a variety of media.

Prerequisite: None

CHC2L1 LDCC

World History to the End of the Fifteenth Century Grade 11

This course explores the history of various societies around the world, from earliest times to around 1500 CE. Students will examine life in and the legacy of various ancient and pre-modern societies throughout the world, including those in, Africa, Asia, Europe, and the Americas. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating social, political, and economic structures and historical forces at work in various societies and in different historical eras.

Prerequisite: CHC2P1 or CHC2D1 or NAC2O1

CHW3M1 University/College

World History since the Fifteenth Century Grade 12

This course traces major developments and events in world history since approximately 1450. Students will explore social, economic, and political changes, the historical roots of contemporary issues, and the role of conflict and cooperation in global interrelationships. They will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, as they investigate key issues and assess societal progress or decline in world history.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

World History since the Fifteenth Century Grade 12

This course explores key developments and events in world history since approximately 1450, with a focus on interactions within and between various regions. Students will examine social, economic, and political developments and how they have affected different peoples. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key turning points in world history and historical forces that have shaped our world.

Prerequisite: Any university, university/college, or college preparation course in Canadian and world studies, English, or social sciences and humanities.

CHY4U1 University

CHY4C1 College

Law

Understanding Canadian Law Grade 11

This course explores Canadian law, with a focus on legal issues that are relevant to the lives of people in Canada. Students will gain an understanding of rights and freedoms in Canada, our legal system, and family, contract, employment, tort, and criminal law. Students will use case studies and apply the concepts of legal thinking and the legal inquiry process to develop legal reasoning skills and to formulate and communicate informed interpretations of legal issues, and they will develop the ability to advocate for new laws.

Prerequisite: CHC2P1 or CHC2D1 or NAC2O1

CLU3M1 University/College

Understanding Canadian Law Grade 11

This course enables students to develop a practical understanding of laws that affect the everyday lives of people in Canada, including their own lives. Students will gain an understanding of the need for laws, and of their rights, freedoms, and responsibilities under Canadian law. Topics include laws relating to marriage, the workplace, cyber bullying, and the processing of criminal offences. Students will apply the concepts of legal thinking and the legal inquiry process, and will begin to develop legal reasoning skills and an understanding of Canadian law.

Prerequisite: CHC2L1 or CHC2P1 or NAC2O1

CLU3E1 Workplace

Canadian and International Law Grade 12

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop their understanding of the principles of Canadian and international law when exploring rights and freedoms within the context of topics such as religion, security, cyberspace, immigration, crimes against humanity, and environmental protection. Students will apply the concepts of legal thinking and the legal inquiry process when investigating these issues in both Canadian and international contexts, and they will develop legal reasoning skills and an understanding of conflict resolution in the area of international law.

Prerequisite: Any university or university/college preparation course in Canadian and world studies, English, or social sciences and humanities

CLN4U1 University

Legal Studies Grade 12

This course provides a foundation for students who wish to pursue a career that requires an understanding of law. Students will explore the importance of law, analyzing contemporary legal issues and their impact. They will investigate requirements for various law-related careers as well as legal responsibilities in the workplace. Students will apply the concepts of legal thinking and the legal inquiry process to investigate the role of law in a changing society and will develop conflict-resolution skills needed for negotiation.

Prerequisite: CHV2O5

CLN4C1 College

Computer Studies

Digital Technology and Innovations in the Changing World (Game Programming, AI, and Cyber Security) Grade 10

This course introduces students to computer programming. Students will plan and write simple computer programs by applying fundamental programming concepts, and learn to create clear and maintainable internal documentation. They will also learn to manage a computer by studying hardware configurations, software selection, operating system functions, networking, and safe computing practices. Students will also investigate the social impact of computer technologies, and develop an understanding of environmental and ethical issues related to the use of computers.

Prerequisite: None

ICD2O1

Open

Introduction to Computer Science (Game Objects and Algorithms) Grade 11

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development life-cycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields.

Prerequisite: None

ICS3U1 University

**Introduction to Computer Programming
(Game Objects and Algorithms)****Grade 11**

This course introduces students to computer programming concepts and practices. Students will write and test computer programs, using various problem-solving strategies. They will learn the fundamentals of program design and apply a software development life-cycle model to a software development project. Students will also learn about computer environments and systems, and explore environmental issues related to computers, safe computing practices, emerging technologies, and postsecondary opportunities in computer-related fields.

Prerequisite: None**ICS3C1****College****Computer Science (Data, Apps, and 3D)****Grade 12**

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyze algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field.

Prerequisite: ICS3U1**ICS4U1****University****Computer Programming (Data and Apps)****Grade 12**

This course further develops students' computer programming skills. Students will learn object-oriented programming concepts, create object-oriented software solutions, and design graphical user interfaces. Student teams will plan and carry out a software development project using industry-standard programming tools and proper project management techniques. Students will also investigate ethical issues in computing and expand their understanding of environmental issues, emerging technologies, and computer-related careers.

Prerequisite: ICS3C1 or ICS3U1**ICS4C1****College**

English Compulsory Courses

English**Grade 10**

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course.

Prerequisite: ENG1D1 or ENG1DA**ENG2D1****Academic****English - Pre-Advanced Placement****Grade 10**

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course.

Prerequisite: ENG1D1 or ENG1DA**ENG2DA****Academic****English****Grade 10**

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course.

Prerequisite: ENG1D1 or ENG1DA**ENG2P1****Applied****English****Grade 10**

In this course, students focus on extending their literacy and communication skills to prepare for success in their daily lives, in the workplace, in the English Grade 11 Workplace course, or in the English: Contemporary Aboriginal Voices, Grade 11 Workplace course (if offered.) The course is organized into strands that extend listening and talking skills, reading and viewing skills, and writing skills. In all strands, the focus is on refining foundational literacy skills and on using language clearly and accurately in a variety of authentic contexts. Students build on their strategies and engage in the processes involved in talking, listening, reading, viewing, writing and thinking, and reflect regularly upon their growth in these areas.

Prerequisite: ENG1L1 or ENG1D1**ENG2L1****LDC****English: First Nations, Métis, and Inuit Voices****Grade 11**

This course explores themes, forms, and stylistic elements of a variety of literary, informational, graphic, oral, cultural, and media text forms emerging from First Nations, Métis, and Inuit cultures in Canada, and also examines the perspectives and influence of texts that relate to those cultures. In order to fully understand contemporary text forms and their themes of identity, relationship, and self-determination, sovereignty, or self-governance, students will analyze the changing use of text forms by Indigenous authors/creators from various periods and cultures in expressing ideas related to these themes. Students will also create oral, written, and media texts to explore their own ideas and understanding, focusing on the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. The course is intended to prepare students for the compulsory Grade 12 English university or college preparation course.

Prerequisite: ENG2D1 or ENG2DA**NBE3U1****University****English - Pre-Advanced Placement****Grade 11**

This course emphasizes the development of literacy, critical thinking, and communication skills. Students will analyze challenging literary texts from various periods, countries, and cultures, as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university or college preparation course.

Prerequisite: ENG2D1 or ENG2DA**ENG3UA****University****English****Grade 11**

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will study the content, form, and style of a variety of informational and graphic texts, as well as literary texts from Canada and other countries, and create oral, written and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity. The course is intended to prepare students for the compulsory Grade 12 college preparation course.

Prerequisite: ENG2P1 or ENG2D1**ENG3C1****College****English****Grade 11**

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in the workplace and in daily life. Students will study the content, form, and style of a variety of contemporary informational, graphic, and literary texts; and create oral, written, and media texts in a variety of forms for practical purposes. An important focus will be on using language clearly and accurately in a variety of formal and informal contexts. The course is intended to prepare students for the compulsory Grade 12 workplace preparation course.

Prerequisite: ENG2P1 or ENG2L1**ENG3E1****Workplace****English****Grade 12**

This course emphasizes consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

Prerequisite: ENG3UA or NBE3U1**ENG4U1****University**

English - Advanced Placement
Grade 12

This course emphasizes consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

Ontario Secondary School Literacy Course
Grade 12

This course is designed to help students acquire and demonstrate the cross-curricular literacy skills that are evaluated by the Ontario Secondary School Literacy Test (OSSLT). Students who complete the course successfully will meet the provincial literacy requirement for graduation. Students will read a variety of informational, narrative, and graphic texts and will produce a variety of forms of writing, including summaries, information paragraphs, opinion pieces, and news reports. Students will also maintain and manage a portfolio containing a record of their reading experiences and samples of their writing.

Eligibility Requirement: Students who have been eligible to write the OSSLT at least once and who have been unsuccessful at least once are eligible to take the course. (Students who have already met the literacy requirement for graduation may be eligible to take the course under special circumstances, at the discretion of the Principal.)

OLC4O1
Open

English
Grade 12

This course emphasizes consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.

Prerequisite: ENG3C1 or NBE3C1 or NBE3U1 or ENG3UA

ENG4C1
College

English
Grade 12

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in the workplace and in daily life. Students will analyze informational, graphic, and literary texts and create oral, written and media texts in a variety of forms for workplace-related and practical purposes. An important focus will be on using language accurately and organizing ideas and information coherently. The course is intended to prepare students for the workplace and active citizenship.

Prerequisite: ENG3E1 or NBE3E1 or ENG3C1 or NBE3C1

ENG4E1
Workplace

Optional Courses

The Writer's Craft
Grade 12 - eLearning

This course emphasizes knowledge and skills related to the craft of writing. Students will analyze models of effective writing; use a workshop approach to produce a range of works; identify and use techniques required for specialized forms of writing; and identify effective ways to improve the quality of their writing. They will also complete a major paper as part of a creative or analytical independent study project and investigate opportunities for publication and for writing careers.

Prerequisite: ENG3UA or NBE3U1

EW4UE
University

First Nations, Métis, and Inuit Languages

FNMI Languages: Ojibwe
Level 1

This course is open to the entire student body and will allow students who have no prior Native language experience to develop an appreciation for a Native language and culture, to explore and experience a unique world view, and to learn to speak a Native language. Students will use the language being studied for greetings and daily routines, become familiar with its writing and sound system, and practise basic vocabulary and phrases. Students will also use information technology during course-related activities.

Prerequisite: None

LNOA01
Open

FNMI Languages: Ojibwe
Level 2

This course will enable students to experience the unique respect for life that permeates Native languages and cultures. Students will expand their vocabulary and knowledge of phrases and expressions, using them in simple dialogues, narrative writing, grammatical constructions, and reading, and to exchange information electronically. This course is open to any student who has successfully completed at least four years of elementary Native language study, has successfully completed NI1, or demonstrates the required proficiency.

Prerequisite: LNOA01

LNOB01
Open

First Nations, Métis, and Inuit Studies

First Nations, Métis, and Inuit Peoples in Canada
Grade 10

This course explores First Nations, Métis, and Inuit peoples' relationships with Canada from pre-contact to the 21st century. Students will examine social, economic, political and military interactions that impact the contemporary realities of Aboriginal people in Canada in relation to identity, culture, community, land, and governance. Students will explore their own and others' ideas using the historical inquiry process to think critically and respond responsibly about civic questions raised today as a result of the changing relationships.

Prerequisite: None

NAC201
Open

Beliefs, Values and Aspirations of Aboriginal Peoples
in Contemporary Society
Grade 11

This course focuses on the diverse beliefs, values, and aspirations between First Nations, Métis, and Inuit peoples of Canada and the political, economic, cultural and social challenges facing Aboriginal individuals and communities from various regions and cultures. By examining their own beliefs, values and assumptions, the worldviews of others and factors that influence world views, students will appreciate how traditional and contemporary beliefs and values influence present and future aspirations of Aboriginal peoples.

Prerequisite: NAC201 or CHC2P1 or CHC2D1

NBV3C1
College

Issues of Indigenous Peoples in a Global Context
Grade 12

This course provides students with an overview of the issues and challenges that confront indigenous peoples worldwide. Students will develop an understanding of the concerns and aspirations of the world's indigenous population, plan and conduct research on global issues that have an impact on indigenous peoples, and use information technology to consult materials related to the views of indigenous peoples throughout the world.

Prerequisite: Any Grade 11 university, university/college, or college preparation course in FNMI studies.

NDW4M1
University/College

First Nations, Métis, and Inuit Business

The Aboriginal Youth Entrepreneurship Program (AYEP) is funded, and dependent on funding to run, by the Martin Family Initiative and as specified, is only open to First Nations, Métis, and Inuit students.

The two-credit program focuses on ways in which entrepreneurs recognize opportunities, generate ideas, and organize resources to plan successful ventures that enable them to achieve their goals. Students create business plans for their own ventures. Through hands-on experiences, they will have opportunities to develop the values, characteristics, and skills often associated with successful entrepreneurs. The goal of AYEPP is to help Aboriginal youth develop the attitudes and skills necessary to achieve success in secondary school, in the workplace, during post-secondary education or training, and in daily life. The program invites students to develop entrepreneurial opportunities that can lead to business ownership. They gain an introduction to business that will help them prepare for the working world regardless of their choice of career. The program is also designed to improve proficiency in business mathematics, English, accounting, marketing, and information and communications technology, while supporting the acquisition of leadership skills.

Introduction to Entrepreneurship
Grade 11
This course focuses on ways in which entrepreneurs recognize opportunities, generate ideas, and organize resources to plan successful ventures that enable them to achieve their goals. Students will create a venture plan for a student-run business. Through hands-on experiences, students will have opportunities to develop the values, traits, and skills most often associated with successful entrepreneurs.
Prerequisite: None

E-Commerce
Grade 12
This course provides students with the opportunity to develop and apply entrepreneurial skills through the creation of a venture plan that capitalizes on the potential of e-commerce. Students will research and identify an opportunity for a venture. They will then complete the components of a venture plan that includes a website.
Prerequisite: None

French as a Second Language

Core French

Core French
Grade 10
This course provides opportunities for students to communicate in French about personally relevant, familiar, and academic topics in real-life situations with increasing independence. Students will exchange information, ideas, and opinions with others in guided and increasingly spontaneous spoken interactions. Students will develop their skills in listening, speaking, reading, and writing through the selective use of strategies that contribute to effective communication. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.
Prerequisite: FSF1D1

Core French
Grade 11
This course offers students extended opportunities to speak and interact in real-life situations in French with greater independence. Students will develop their listening, speaking, reading, and writing skills, as well as their creative and critical thinking skills, through responding to and exploring a variety of oral and written texts. They will also broaden their understanding and appreciation of diverse French-speaking communities and will develop skills necessary for lifelong language learning.
Prerequisite: FSF2D1

Core French
Grade 12
This course provides extensive opportunities for students to speak and interact in French independently. Students will apply language-learning strategies in a wide variety of real-life situations, and will continue to develop their creative and critical thinking skills through responding to and interacting with a variety of oral and written texts. Students will also continue to enrich their understanding and appreciation of diverse French-speaking communities and to develop the skills necessary for life-long language learning.
Prerequisite: FSF3U1

American Sign Language (ASL)

American Sign Language as a Second Language
LASB01
This course provides opportunities for students to begin to develop foundational language skills and cultural competencies in American Sign Language (ASL). Students will begin to engage in basic ASL conversational discourses in guided and interactive settings. Using a variety of strategies, they will develop skills to comprehend, construct, and present various basic ASL literary works and ASL texts, and begin to develop an understanding of the connections between ASL language, culture, and community. They will also develop the knowledge and skills necessary for lifelong language learning.
Prerequisite: None

Guidance and Career Education

Career Studies (0.5 Credit)
Grade 10
This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students will access their interests, skills, and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores post secondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.
Prerequisite: None

Career Studies (0.5 Credit)
Grade 10 - eLearning
Prerequisite: None

Creating Opportunities through Cooperative Education (2 Credits)
Grade 11
This course consists of a learning experience connected to a community and a cooperative education curriculum focused on developing skills, knowledge, and habits of mind that will support students in their learning, including their education and career/life planning, at school and beyond, today and in the future. Within the context of their experience connected to a community, students will apply skills, knowledge, and habits of mind that will protect and promote their health, safety, and well-being and that will strengthen their inquiry, decision-making, and leadership skills. Students will create and implement a learning plan that meets their particular interests and needs, reflect on their learning, and make connections between their experience in the community and other aspects of their lives.
Prerequisite: None

Cooperative Education (2 Credits)
Grade 11/12
This course is a partnership between the school and the community. The intent of a Cooperative Education placement is to provide students with effective skills, attitudes and work habits necessary to enter the work force and/or further academic pursuits. Senior students may earn credits while working in a job that is directly related to a senior course that the student is taking (or has taken recently.) Students are not paid while at a Co-op placement. Students attend their cooperative education placement in the morning or in the afternoon for one semester to earn 2 credits. Students are monitored by the Co-op teacher.
*** SHSM Students choose this section**
Prerequisite: None

Health and Physical Education

Healthy Active Living Education Grade 10

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

PPL201 Open

Introduction to Personal Fitness Grade 10

This course focuses on the development of a healthy lifestyle through the introduction of fitness activities in our state-of-the-art fitness facility. Through the introduction and development of weight training, aerobics, and a variety of athletic training methods, students will explore personal fitness goal-setting and physical well-being.

Prerequisite: None

PAF201 Open

Health for Life - eLearning Grade 11

This course enables students to examine the factors that influence their own health practices and behaviours as well as those factors that contribute to the development of healthy communities. It emphasizes the concept of wellness, which addresses all aspects of well-being – physical, cognitive, emotional, spiritual and social – and promotes healthy eating, physical activity, and building and maintaining a positive sense of self. Students will develop the skills necessary to make healthy choices and create a personal wellness plan. They will also design initiatives that encourage others to lead healthy, active lives. The course prepares students for college programs in health sciences, fitness, wellness, and health promotion.

Prerequisite: None

PPZ3CE College

Healthy Active Living Education Grade 11

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

PPL301 Open

Personal Fitness Grade 11

This course builds on the skills, training and fitness of PAF201 in our state-of-the-art fitness facility. Through the continued development of skills and practice in weight training, aerobics, and a variety of athletic training methods, students will explore personal fitness goal-setting and lifelong physical well-being.

Prerequisite: None

PAF301 Open

Healthy Active Living Education Grade 12

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

Prerequisite: None

PPL401 Open

Personal Fitness Grade 12

This course culminates the skills, training and fitness of PAF201 and PAF301 in our state-of-the-art fitness facility. Growing on their learning skills and practice in weight training, aerobics, and a variety of athletic training methods, students will further develop their personal fitness knowledge and lifelong physical well-being for possible advancements in the personal training and fitness career path.

Prerequisite: None

PAF401 Open

Introductory Kinesiology Grade 12

This course focuses on the study of human movement and of systems, factors, and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity and sport, and the physiological, psychological, and social factors that influence an individual's participation in physical activity and sport. The course prepares students for university programs in physical education and health, kinesiology, health sciences, health studies, recreation, nursing, and sports administration.

Prerequisite: Any Grade 11 University or University/College preparation course in science, or any Grade 11 or 12 course in Health and Physical Education.

PSK4U1 University

Mathematics

Principles of Mathematics Grade 10

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relationships and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multi-step problems and communicate their thinking.

Prerequisite: MTH1W1 or MTH1WA

MPM2D1 Academic

Principles of Mathematics - Pre-Advanced Placement Grade 10

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relationships and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically as they solve multi-step problems and communicate their thinking.

Prerequisite: MTH1W1 or MTH1WA

MPM2DA Academic

Foundations of Mathematics Grade 10

This course enables students to consolidate their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic relationships. Students will investigate similar triangles, the trigonometry of right-angled triangles, and the measurement of three-dimensional objects. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MTH1W1 or MTH1WA

MF2M2P1 Applied

Mathematics Grade 10

This course emphasizes further development of mathematical knowledge and skills to prepare students for success in their everyday lives, in the workplace, and in the Grade 11 Mathematics Workplace course. The course is organized in three strands related to money sense, measurement, and proportional reasoning. In all strands, the focus is on developing and consolidating key foundational mathematical concepts and skills by solving authentic, everyday problems. Students have opportunities to further develop their mathematical literacy and problem-solving skills and to continue developing their skills in reading, writing, and oral language through relevant and practical math activities.

Prerequisite: MAT1L1 or MTH1W1 or MTH1WA

MAT2L1 LDCC

Functions Grade 11 This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; and develop facility in simplifying polynomial and rational expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems. Prerequisite: MPM2D1 or MPM2DA	MCR3U1 University	Calculus and Vectors Grade 12 This course builds on students' experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors, and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, rational, exponential, and sinusoidal functions; and apply these concepts and skills to the modelling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who plan to study mathematics in university and who may choose to pursue careers in fields such as physics and engineering. Prerequisite: MHF4U1 can be taken concurrently with (see * below) or can precede MCV4U1	MCV4U1 University
Functions - Pre-Advanced Placement Grade 11 This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; and develop facility in simplifying polynomial and rational expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems. Prerequisite: MPM2D1 or MPM2DA	MCR3UA University	Concurrent 2 Credit offering for AP Mathematics Students Advanced Functions / Calculus and Vectors Please take a moment to read the course descriptions for the full curriculum overview and expectations. This 2 credit, consecutive offering of the senior math courses will allow students to begin the AP Calculus and Vectors immediately upon completion of the Advanced Functions. The course extends students' experience with Functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will refine their use of the mathematical processes necessary for success in senior Mathematics. This course is intended both for students taking the Calculus and Vectors courses as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.	Full Year 12MFCV
Functions and Applications Grade 11 This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modelling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to financial and trigonometric applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems. Prerequisite: MFM2P1 or MPM2D1 or MPM2DA	MCF3M1 University/College	This 2 credit, consecutive offering builds on students' previous experience with functions and their developing understanding of rates of change. Students will broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions, apply these concepts and skills to the modelling of real-world relationships; and extend their knowledge of calculus to the field of integration and related theorems. Students will refine their use of the mathematical processes necessary for success in senior Mathematics. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space. This combined 2 credit course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course. Prerequisites: MCR3U1 or MCR3UA	
Foundations for College Mathematics Grade 11 This course enables students to broaden their understanding of mathematics as a problem-solving tool in the real world. Students will extend their understanding of quadratic relations, as well as of measurement and geometry; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; and develop their ability to reason by collecting, analysing, and evaluating data involving one or two variables. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. Prerequisite: MFM2P1 or MPM2D1 or MPM2DA	MBF3C1 College	Data Management Grade 12 This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing large amounts of information; solve problems involving probability and statistics; and carry out a culminating project that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest. Prerequisite: MCF3M1 or MCR3U1 or MCR3UA	MDM4U1 University
Mathematics for Work and Everyday Life Grade 11 This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will solve problems associated with earning money, paying taxes, and making purchases; apply calculations of simple and compound interest in saving, investing, and borrowing; and calculate the costs of transportation and travel in a variety of situations. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. Prerequisite: MAT2L1 or MFM2P1 or MPM2D1	MEL3E1 Workplace		
Advanced Functions Grade 12 This course extends students' experiences with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students who plan to study mathematics in university and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs. Prerequisite: MCR3U1 or MCT4C1 or MCR3UA	MHF4U1 University	Foundations for College Mathematics Grade 12 This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyze data using statistical methods; solve problems involving applications of geometry and trigonometry; solve financial problems connected with annuities, budgets, and renting or owning accommodation; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades. Prerequisite: MBF3C1 or MCF3M1 or MCR3UA or MCR3U1	MAP4C1 College
		Mathematics for College Technology Grade 12 This course enables students to extend their knowledge of functions. Students will investigate and apply properties of polynomial, exponential, and trigonometric functions; continue to represent functions numerically, graphically, and algebraically; develop facility in simplifying expressions and solving equations; and solve problems that address applications of algebra, trigonometry, vectors, and geometry. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares	MCT4C1 College

students for a variety of college technology programs.
Prerequisite: MCF3M1 or MCR3U1 or MCR3UA

Mathematics for Work and Everyday Life
Grade 12

This course enables students to broaden their understanding of mathematics as it is applied in the workplace and daily life. Students will investigate questions involving the use of statistics; apply the concept of probability to solve problems involving familiar situations; investigate accommodation costs and create household budgets; use proportional reasoning; estimate and measure; and apply geometric concepts to create designs. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

Prerequisite: MEL3E1

MEL4E1
Workplace

Science
General Science

Science
Grade 10

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to relate science to technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid-base reactions; forces that affect climate and climate change; and the interaction of light and matter.

Prerequisite: SNC1W1 or SNC1WA

SNC2D1
Academic

Science - Pre-Advanced Placement

Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid-base reactions; forces that affect climate and climate change; and the interaction of light and matter.

Prerequisite: SNC1W1 or SNC1WA

SNC2DA
Academic

Science
Grade 10

This course enables students to develop a deeper understanding of concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science in real-world situations. Students are given opportunities to develop further practical skills in scientific investigation. Students will plan and conduct investigations into everyday problems and issues related to human cells and body systems; chemical reactions; factors affecting climate change; and the interaction of light and matter.

Prerequisite: SNC1W1 or SNC1WA

SNC2P1
Applied

Biology

Biology
Grade 11

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Prerequisite: SNC2D1 or SNC2DA

SBI3U1
University

Biology - Pre-Advanced Placement
Grade 11

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Prerequisite: SNC2D1 or SNC2DA

SBI3UA
University

Biology
Grade 11

This course focuses on the processes that occur in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, genetics, the anatomy of mammals, and the structure of plants and their role in the natural environment. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SNC2P1 or SNC2D1 or SNC2DA

SBI3C1
College

Biology
Grade 12

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SBI3U1 or SBI3UA

SBI4U1
University

Biology - Advanced Placement
Grade 12

This course provides students with the opportunity for indepth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on the achievement of detailed knowledge and the refinement of skills needed for further study in various branches of the life sciences and related fields.

Prerequisite: SBI3U1 or SBI3UA

SBI4UA
University

Chemistry

Chemistry
Grade 11

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

Prerequisite: SNC2D1 or SNC2DA

SCH3U1
University

Chemistry
Grade 12

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop their problem solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment.

Prerequisite: SCH3U1

SCH4U1
University

Chemistry
Grade 12

This course enables students to develop an understanding of chemistry through the study of matter and qualitative analysis, organic chemistry, electrochemistry, chemical calculations, and chemistry as it related to the quality of the environment. Students will use a variety of laboratory techniques, develop skills in data collection and scientific analysis, and communicate scientific information using appropriate terminology. Emphasis will be placed on the role of chemistry in daily life and the effects of technological applications and processes on society and the environment.

Prerequisite: SNC2P1 or SNC2D1 or SNC2DA or SCH3U1

SCH4C1
College

Physics

Physics
Grade 11

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces; energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics.

SPH3U1
University

ics. In addition, they will analyze the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment.

Prerequisite: SNC2D1 or SNC2DA

**Physics
Grade 12**

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their exploration of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyze qualitatively and quantitatively, data relating to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: SPH3U1

**SPH4U1
University**

**Physics
Grade 12**

This course develops students' understanding of the basic concepts of physics. Students will explore these concepts with respect to motion; mechanical, electrical, electromagnetic, energy transformation, hydraulic, and pneumatic systems; the operation of commonly used tools and machines. They will develop their scientific investigation skills as they test laws of physics and solve both assigned problems and those emerging from their investigations. Students will also consider the impact of technological applications of physics on society and the environment.

Prerequisite: SNC2P1 or SNC2D1 or SNC2DA or SPH3U1

**SPH4C1
College**

Environmental Science

**Environmental Science
Grade 11**

This course provides students with the fundamental knowledge and skills related to environmental science that will help them succeed in life after secondary school. Students will explore a range of topics, including the role of science in addressing contemporary environmental challenges; the impact of the environment on human health; sustainable agriculture and forestry; the reduction and management of waste; and the conservation of energy. Students will increase their scientific and environmental literacy and examine the interrelationships between science, the environment, and society in a variety of areas.

Prerequisite: SNC2P1 or SNC2D1 or SNC2DA

**SVN3M1
University/College**

**Environmental Science
Grade 11**

This course provides students with the fundamental knowledge of and skills relating to environmental science that will help them succeed in work and life after secondary school. Students will explore a range of topics, including the impact of human activities on the environment; human health and the environment; energy conservation; resource science and management; and safety and environmental responsibility in the workplace. Emphasis is placed on relevant, practical applications and current topics in environmental science, with attention to the refinement of students' literacy and mathematical literacy skills as well as the development of their scientific and environmental literacy.

Prerequisite: SNC1W1 or SNC1WA or SNC2P1 or SNC1P1 or SNC2D1

**SVN3E1
Workplace**

Social Sciences and Humanities

Family Studies

**Food and Nutrition
Grade 10**

This course focuses on guidelines for making nutritious food choices. Students will investigate factors that influence food choices, including beliefs, attitudes, current trends, traditional eating patterns, food marketing strategies, and individual needs. Students will also explore the environmental impact of a variety of food choices at the local and global level. The course provides students with opportunities to develop food preparation skills and introduces them to the use of social science research methods in the area of food and nutrition.

Prerequisite: None

**HFN2O1
Open**

**Food and Culture
Grade 11**

This course focuses on the flavours, aromas, cooking techniques, foods, and cultural traditions of world cuisines. Students will explore the origins of and developments in diverse food traditions. They will demonstrate the ability to cook with ingredients and equipment from a variety of cultures, compare food-related etiquette in many countries and cultures, and explain how Canadian food choices and traditions have been influenced by other cultures. Students will develop practical skills and apply social science research methods while investigating foods and food practices from around the world.

Prerequisite: None

**HFC3M1
University/College**

**Food and Culture
Grade 11**

This course focuses on the flavours, aromas, cooking techniques, foods, and cultural traditions of world cuisines. Students will demonstrate the ability to cook with ingredients and equipment from a range of cultures, describe food-related etiquette in a variety of countries and cultures, and explore ways in which Canadian food choices and traditions have been influenced by other cultures. Students will have opportunities to develop practical skills and apply research skills as they investigate foods and food practices from around the world.

Prerequisite: None

**HFC3E1
Workplace**

**Understanding Fashion
Grade 11**

This course introduces students to the world of fashion. Students will gain an understanding of theories related to fashion trends and of how culture, media, fashion cycles, retailing, and social and environmental factors influence fashion trends and consumer behaviour. Students will use various tools, technologies, and techniques safely and correctly to create fashion items. They will apply knowledge of fibres, fabrics, and the elements and principles of design when creating and assessing fashion-related products. Students will develop research skills as they investigate topics related to fashion.

Prerequisite: None

**HNC3C1
College**

**Raising Healthy Children
Grade 11**

This course focuses on the skills and knowledge parents, guardians, and caregivers need, with particular emphasis on maternal health, pregnancy, birth, and the early years of human development (birth to six years old). Through study and practical experience, students will learn how to meet the developmental needs of young children, communicate with them, and effectively guide their early behaviour. Students will develop their research skills through investigations related to caregiving and child rearing.

Prerequisite: None

**HPC3O1
Open**

**Nutrition and Health
Grade 12**

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health.

Prerequisite: Any university, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies

**HFA4U1
University**

**Food and Healthy Living
Grade 12**

This course focuses on the fundamental food needs of young adults. Students will learn how to stock a kitchen, make nutritious food choices, and accommodate the food needs of others. Through a range of practical experiences, they will develop skills needed in food preparation for personal use and for employment in the food industry. They will also learn about dining etiquette in different contexts and about responsible consumer practices. Students will use social science research methods to investigate issues related to food preparation and nutrition.

Prerequisite: None

**HFL4E1
Workplace**

**Human Development Throughout the Lifespan
Grade 12**

This course offers a multidisciplinary approach to the study of human development throughout the lifespan. Students will learn about a range of theoretical perspectives on human development. They will examine threats to healthy development as well as protective factors that promote resilience. Students will learn about physical, cognitive, and

**HHG4M1
University/College**

social-emotional development from the prenatal period through old age and will develop their research and inquiry skills by investigating issues related to human development.

Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.

Personal Life Management
Grade 12
This course focuses on preparing students for living independently and working successfully with others. Students will learn to manage their personal resources to meet their basic needs for food, clothing, and housing. They will also learn about their personal, legal, and financial responsibilities and develop and apply interpersonal skills in order to make wise and responsible personal and occupational choices. Students will apply research and inquiry skills while investigating topics related to personal life management. The course emphasizes the achievement of expectations through practical experiences.

Prerequisite: None

Social Sciences

Introduction to Anthropology, Psychology, and Sociology
Grade 11
This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science, and to become familiar with current thinking on a range of issues within the three disciplines.

Prerequisite: ENG2D1 or CHC2D1

Challenge and Change in Society
Grade 12
This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyze how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyze causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change.

Prerequisite: Any university, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.

Challenge and Change in Society
Grade 12 - eLearning
Prerequisite: Any university, or university/college preparation course in social sciences and humanities, English, or Canadian and world studies.

Technological Education

Construction Technology

Construction Technology
Grade 10
This course introduces students to building materials and processes through opportunities to design and build various construction projects. Students will create and read working drawings; become familiar with common construction materials, components, and processes; and perform a variety of fabrication, assembly, and finishing operations. They will use a variety of hand and power tools and apply knowledge of imperial and metric systems of measurement, as appropriate. Students will develop an awareness of environmental and societal issues related to construction technology, and will explore secondary and post secondary pathways leading to careers in the industry.

Prerequisite: None

Construction Engineering Technology
Grade 11
This course focuses on the development of knowledge and skills related to residential construction. Students will gain hands on experience using a variety of construction materials, processes, tools, and equipment; learn about building design and planning construction projects; create and interpret working drawings and sections; and learn how the Ontario Building Code and other regulations and standards apply to construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and explore career opportunities in the field.

Prerequisite: None

Construction Technology
Grade 11
This course enables students to develop technical knowledge and skills related to carpentry, masonry, electrical systems, heating and cooling, and plumbing for residential construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment to design, lay out, and build projects. They will create and read technical drawings, learn construction terminology, interpret building codes and regulations, and apply mathematical skills as they develop construction projects. Students will also develop an awareness of environmental and societal issues related to construction technology, and explore post secondary and career opportunities in the field.

Prerequisite: None

Custom Woodworking
Grade 11
This course enables students to develop knowledge and skills related to cabinet making and furniture making. Students will gain practical experience using a variety of the materials, tools, equipment, and joinery techniques associated with custom woodworking. Students will learn to create and interpret technical drawings and will plan, design, and fabricate projects. They will also develop an awareness of environmental and societal issues related to the woodworking industry, and explore apprenticeships, post secondary training, and career opportunities in the field that may be pursued directly after graduation.

Prerequisite: None

Construction Engineering Technology
Grade 12
This course enables students to further develop knowledge and skills related to residential construction and to explore light commercial construction. Students will gain hands on experience using a variety of materials, processes, tools, and equipment and will learn more about building design and project planning. They will continue to create and interpret construction drawings and will extend their knowledge of construction terminology and of relevant building codes and regulations, as well as health and safety standards and practices. Students will also focus on environmental and societal issues related to construction engineering technology, and explore career opportunities in the field.

Prerequisite: TCJ3C1

Construction Technology
Grade 12
This course enables students to further develop technical knowledge and skills related to residential construction and to explore light commercial construction. Students will continue to gain hands-on experience using a variety of materials, processes, tools, and equipment; create and interpret construction drawings; and learn more about building design and project planning. They will expand their knowledge of terminology, codes and regulations, and health and safety standards related to residential and light commercial construction. Students will also expand their awareness of environmental and societal issues related to construction technology, and will explore entrepreneurship and career opportunities in the industry that may be pursued directly after graduation.

Prerequisite: TCJ3E1 or TCJ3C1

Green Industries

Green Industries
Grade 10
This course introduces students to the various sectors of the green industries – agriculture, forestry, horticulture, floristry, and landscaping. Using materials, processes, and techniques commonly employed in these industries, students will participate in a number of hands-on projects that may include plant or animal propagation; production, maintenance, and harvesting activities; the development of floral or landscaping designs; and/or related construction activities. Students will also develop an awareness of environmental and societal issues related to green industry activities, learn about safe and healthy working practices, and explore secondary and postsecondary education and training pathways and career opportunities in the various industry sectors.

Prerequisite: None

Manufacturing Technology

Manufacturing Technology
Grade 10
This course introduces students to the manufacturing industry by giving them an opportunity to design and fabricate products using a variety of processes, tools, and equipment. Students will learn about technical drawing, properties and preparation of materials, and manufacturing techniques. Student projects may include a robotic challenge, a design challenge, or a fabrication project involving processes such as machining, welding, vacu-

um forming, or injection moulding. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about secondary and post secondary pathways leading to careers in the industry.

Prerequisite: None

SHSM Manufacturing Technology (2 Credits)
Grade 11

TMJ3C2
College

This course enables students to develop knowledge and skills through hands-on, project-based learning. Students will acquire design, fabrication, and problem solving skills while using tools and equipment such as lathes, mills, welders, computer-aided machines, robots, and control systems. Students may have opportunities to obtain industry-standard certification and training. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about pathways leading to careers in the industry.

Prerequisite: None

Manufacturing Technology
Grade 11

TMW3E1
Workplace

This hands-on, project-based course is designed for students planning to enter an occupation or apprenticeship in manufacturing directly after graduation. Students will work on a variety of manufacturing projects, developing knowledge and skills in design, fabrication, and problem solving and using tools and equipment such as engine lathes, milling machines, and welding machines. In addition, students may have the opportunity to acquire industry-standard certification and training. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about secondary school pathways that lead to careers in the industry.

Prerequisite: None

SHSM Manufacturing Technology (2 Credits)
Grade 11

TMJ3E2
Workplace

This hands-on, project-based course is designed for students planning to enter an occupation or apprenticeship in manufacturing directly after graduation. Students will work on a variety of manufacturing projects, developing knowledge and skills in design, fabrication, and problem solving and using tools and equipment such as engine lathes, milling machines, and welding machines. In addition, students may have the opportunity to acquire industry-standard certification and training. Students will develop an awareness of environmental and societal issues related to manufacturing and will learn about secondary school pathways that lead to careers in the industry.

Prerequisite: None

SHSM Manufacturing Technology (2 Credits)
Grade 12

TMJ4C2
College

This course enables students to further develop knowledge and skills related to machining, welding, print reading, computer numerical control (CNC), robotics, and design. Students will develop proficiency in using mechanical, pneumatic, electronic, and computer control systems in a project-based learning environment and may have opportunities to obtain industry-standard training and certification. Students will expand their awareness of environmental and societal issues and career opportunities in the manufacturing industry.

Prerequisite: TMJ3C2 or TMW3E1

SHSM Manufacturing Technology (2 Credits)
Grade 12

TMJ4E2
Workplace

This course enables students to further develop knowledge and skills related to machining, welding, print reading, computer numerical control (CNC), robotics, and design. Students will develop proficiency in using mechanical, pneumatic, electronic, and computer control systems in a project-based learning environment and may have opportunities to obtain industry-standard training and certification. Students will expand their awareness of environmental and societal issues and career opportunities in the manufacturing industry.

Prerequisite: TMJ3C2 or TMW3E1

Manufacturing Technology
Grade 12

TMW4E1
Workplace

This project-driven, hands-on course builds on students' experiences in manufacturing technology. Students will further develop knowledge and skills related to the use of engine lathes, milling machines, welding machines, and other related tools and equipment as they design and fabricate solutions to a variety of technological challenges in manufacturing. Students may have opportunities to acquire industry-standard training and certification. Students will expand their awareness of environmental and societal issues and of career opportunities in the manufacturing industry.

Prerequisite: TMW3E1

Technological Design

Technological Design
Grade 10

TDJ201
Open

This course provides students with opportunities to apply a design process to meet a variety of technological challenges. Students will research projects, create designs, build models and/or prototypes, and assess products and/or processes using appropriate tools, techniques, and strategies. Students projects may include designs for homes, vehicles, bridges, robotic arms, clothing, or other products. Students will develop an awareness of environmental and societal issues related to technological design, and learn about secondary and post secondary education and training leading to careers in the field.

Prerequisite: None

Technological Design & the Environment
Grade 11

TDJ301
Open

This course enables students to apply a systematic process for researching, designing, building, and assessing solutions to address specific human and environmental challenges. Through their work on various projects, students will explore broad themes that may include aspects of industrial design, mechanical design, architectural design, control system design, and/or apparel design. Students will develop an awareness of environmental and societal issues related to technological design, and will learn about secondary and post secondary pathways leading to careers in the field.

Prerequisite: None

Technological Design: Architectural Design
Grade 11

TDA3M1
University/College

This course provides students with opportunities to apply the principles of basic design to technological challenges in industry, engineering, architecture, manufacturing, and graphics. Students will develop problem-solving and design skills through the use of technical drawings and illustrations, model building, testing, and marketing. They will also become aware of consumer, business, and environmental issues in the creation and marketing of products or services, and the educational requirements of design-related careers.

Prerequisite: None

Technological Design: Architectural Design
Grade 12

TDA4M1
University/College

This course provides students with opportunities to solve problems in design through the use of technical drawings, model building, testing, and marketing. Students will research, design, and test solutions for residential or commercial architecture, industrial engineering, and manufacturing. They will also examine the educational requirements of a technical-design related career in engineering, architecture, or industrial design.

Prerequisite: TDA3M1

Transportation Technology

Transportation Technology
Grade 10

TTJ201
Open

This course introduces students to the service and maintenance of vehicles, aircraft, and/or watercraft. Students will develop knowledge and skills related to the construction and operation of vehicle/craft systems and learn maintenance and repair techniques. Student projects may include the construction of a self-propelled vehicle or craft, engine service, tire/wheel service, electrical/battery service, and proper body care. Students will develop an awareness of related environmental and societal issues and will explore secondary and post secondary pathways leading to careers in the transportation industry.

Prerequisite: None

Transportation Technology: Vehicle Ownership
Grade 11

TTJ301
Open

This general interest course enables students to become familiar with the options and features of various vehicles, issues of registration, and the legal requirements affecting vehicle owners. Students will also learn about vehicle financing and insurance, vehicle maintenance, emergency procedures, and the responsibility of being a vehicle owner. Students will develop an awareness of environmental and societal issues related to vehicle ownership and use, and will explore career opportunities in the transportation industry.

Prerequisite: None

SHSM Transportation Technology: Auto Service (2 Credits)
Grade 11

TTA3C2
College

This course enables students to develop technical knowledge and skills as they study, test, service, and repair engine, electrical, suspension, brake, and steering systems on vehicles, aircraft, and/or watercraft. Students will develop communication and teamwork

skills through practical tasks, using a variety of tools and equipment. Students will develop an awareness of environmental and societal issues related to transportation and will learn about apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: None

***Transportation Services: Specialist High Skills Major Component**

SHSM Transportation Technology: Aviation (2 Credits)

Grade 11

This course enables students to develop technical knowledge and skills as they study, test, service, and repair engine, electrical, suspension, brake, and steering systems on vehicles, aircraft, and/or watercraft. Students will develop communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will develop an awareness of environmental and societal issues related to transportation and will learn about apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: None

***Transportation Services: Specialist High Skills Major Component**

SHSM Transportation Technology: Auto Service (2 Credits)

Grade 12

This course enables students to further develop technical knowledge and skills as they study, test, service, and repair engine management systems; power trains; steering/control, suspension; brake, and body systems on vehicles, aircraft, and/or watercraft; and/or small engine products. Students will refine communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will expand their awareness of environmental and societal issues related to transportation and their knowledge of apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: TTA3C2

***Transportation Services: Specialist High Skills Major Component**

SHSM Transportation Technology: Aviation (2 Credits)

Grade 12

This course enables students to further develop technical knowledge and skills as they study, test, service, and repair engine management systems; power trains; steering/control, suspension; brake, and body systems on vehicles, aircraft, and/or watercraft; and/or small engine products. Students will refine communication and teamwork skills through practical tasks, using a variety of tools and equipment. Students will expand their awareness of environmental and societal issues related to transportation and their knowledge of apprenticeship and college programs leading to careers in the transportation industry.

Prerequisite: TTL3C2

***Transportation Services: Specialist High Skills Major Component**

Transportation Technology: Vehicle Maintenance

Grade 12

This course introduces students to the servicing, repair, and maintenance of vehicles through practical applications. The course is appropriate for all students as a general interest course to prepare them for future vehicle operation, care, and maintenance or for entry into an apprenticeship in the motive power trades. Students will develop an awareness of environmental and societal issues related to transportation and will learn about careers in the transportation industry and the skills and training required for them.

Specialist High Skills Major Programs

Cooperative Education

Cooperative Education is a unique program for students, integrating academic and technical study with practical experience in business and industry.

This learning experience helps students make informed decisions about future careers. Students also develop the work habits, attitudes and job skills necessary for a successful transition from secondary school to the workplace or post-secondary education. Cooperative Education students are typically in the senior grades, have a variety of post-secondary destinations: apprenticeship, college, university, work, and may be studying in any subject area.

Cooperative education opportunities are available in all Lakehead Public High Schools.

Ontario Youth Apprenticeship Program (OYAP)

All senior students can explore the career potential of the skilled trades with OYAP as their start point. Over 140 skilled trades offer an opportunity to learn, work and enjoy occupations with career flexibility and portability, professional licensing, a wide range of further training opportunities, small business ownership and a diversified and valued skill set.

Students can begin to accumulate credit towards an apprenticeship in their chosen skilled trade while they complete the requirements of their high school education. Students who are interested in participating in OYAP will need to choose cooperative education in their Grade 11 and/or Grade 12 year. To participate, students must have completed 16 credits and be at least 16 years of age.

An Ontario Youth Apprenticeship Program (OYAP) student is a student who is earning cooperative education credits for work experience in an apprenticeship occupation. The student may or may not be formally registered as an apprentice while attending secondary school.

Cooperative Education Programs

Canadian Armed Forces

Army Reserve

COP4XA

Semester 2

The Army Reserve Co-op Program includes basic military training as an introduction to life in the Canadian Forces, specific to the Army Reserve. This means training to be a member of one of the Army Reserve units in Thunder Bay, at the Armoury on Park Avenue. The Army Reserve units in Thunder Bay are: 736 Communications Squadron, which specializes in electronic communications; the Lake Superior Scottish Regiment, which is an infantry unit; 18 Service Battalion, which specializes in transport, supply/logistics and technical repair and maintenance; and 18 Field Ambulance, which specializes in health care and trauma support services.

To be eligible, students must meet the following conditions:

- 16 years old prior to the starting date of the program;
- A Canadian citizen;
- Have a minimum of 15 credits prior to the start of the program;
- Enrolled in Semester 2 Co-op (afternoon);
- Successfully complete the entrance requirements prior to December 1 of the school year (physical, medical, aptitude);
- Able to attend program from 1:00 p.m. - 5:30 p.m., Monday through Friday and the occasional weekend training sessions.

Naval Reserve

COP4XN

Semesters 1 & 2

The Naval Reserve Co-op Program includes introductory training to life in the Canadian Forces, specifically the Canadian Naval Reserve. This means training to be part of the crew of a Canadian Navy Ship, a member of a Port Security Unit, a Port Inspection Diving Team or a Naval Intelligence Team. Students will work out of HMCS Griffon, Thunder Bay's Naval Reserve Unit located on Algoma Street.

To be eligible students must meet the following conditions:

- 16 years old prior to the start date of the program;
- A Canadian citizen;
- Have a minimum of 15 credits prior to start date;
- Enrolled in Co-op (afternoon);
- Successfully complete the entrance requirements prior to the start of the semester (physical, medical, aptitude);
- Be able to attend program from 1:00 p.m. - 4:00 p.m.
- Monday - Friday and able to attend the occasional weekend training session.

Aviation Technology

TTL3C2 | TTL4C2

Aviation Technology is a program that is taught at the Confederation College A.C.E. Centre located at the Thunder Bay International Airport.

Grade 11 Semester 1 | Grade 12 Semester 2

Students will study aerodynamics, aircraft components, aircraft hardware and materials, inspection procedures and methods, ground marshalling and handling of aircraft, aircraft engines, and flight related subjects. Aviation Technology may include a cooperative education component incorporating practical experience within the aviation industry at the airport. This partnership between Lakehead Public Schools and Confederation College will give students regular exposure to the College's A.C.E. Aviation facility. Included in the program are field trips to related industries such as air traffic control, Bombardier and the Ministry of Natural Resources (CL415 Water Bombers.) All mathematics and physics requirements will be taught in the program.

Dual Credits

Secondary Credit + College Credit

Dual credits are defined as a high school credit and a college credit earned at the same time. The opportunity to earn two credits simultaneously is available to senior students in programs that vary each year.

College Link

The College Link program will bring students into the college environment while completing their high school course requirements. College Link emphasizes communication, literacy, and planning for the future.

Students will be enrolled in the dual credit course General Education Elective while working on high school credits through an independent learning model. Once a student has achieved that dual credit successfully they are then allowed to take up to three (3) college delivered dual credit top up courses.

College Link courses are subject to change, please see Student Services for a current list of course options.

Monday-Friday | 9:30 am 3:30 pm

Please see Administration/Vice Principal to be enrolled in the College Link Program.

Team Taught Dual Credits

These programs are team taught by College and Secondary School Staff. Students are able to obtain both a Secondary Credit and a College Credit simultaneously. These dual credit opportunities are available at the designated school.

Aviation Link

TTL4C Transportation Technology: Light Aircraft (Grade 12) & TP166 Aviation Studies 1 (College)

Students will be introduced to a variety of basic skills related to the aviation industry. Students will have the opportunity to use aircraft simulators, classroom time, and practicum in an actual aircraft maintenance hangar. This course is recommended for students who are considering flight management, aviation technician, or aerospace manufacturing engineering technician / technology as a future program. Through a combination of theory and practical experience, students will gain the background necessary to proceed with further study in a more advanced program.

Superior | Hammar skjold | Westgate

Communication for Success Link

ENG4C English (Grade 12) & CS007 Persuasive Writing (College)

This course will focus on communication as it applies to students' chosen career pathway, with a specific focus on literacy skills necessary in the trades and technology programs at the post secondary level. Students will learn how to express themselves clearly, correctly, and persuasively in written form through analytical reading and critical thinking based on current issues and resources. This course will also help students to compile and present research in essay form in an effective and coherent manner according to the APA style of documentation. In particular, students will engage in pre-writing strategies to locate, sort and organize information for potential writing tasks; determine the relevancy and appropriateness of topics; generate an outline for a report or presentation; edit and proof-read written tasks; and publish a document according to accepted conventions.

Hammar skjold

Manufacturing Link

TMJ4E Manufacturing Technology (Grade 12) or TMW4E (Welding) & WC 126 Flat T-Joint Module (College)

In this course the students will identify the different welding procedures for T-Joints in flat, horizontal, vertical and overhead positions. Welding exercises are demonstrated using 6010-11 and 7018 electrodes in these positions and specific safety precautions for overhead welding are addressed.

Superior | Westgate

Transportation Link

TTA4C Transportation Technology (Grade 12) & HC 121 Applied Work Practices and Procedures (College)

This course introduces students to occupational health and safety, basic hand and power tools, precision measuring tools, fastening devices and torquing procedures. Heating and cutting methods are introduced.

College Now!

<http://www.confederationcollege.ca/collegenow>

Change Your Life Through Learning

The College Now program is provided in partnership with the School College Work Initiative (SCWI), the Thunder Bay Catholic District School Board, and Lakehead Public Schools. Students can take "College Now" courses with an opportunity to earn credits that count toward both a secondary school and college diploma or certificate. Dual Credits let students "experience" college courses while still in high school.

Students must be:

- 17 or 18 years old in the graduating year;
- working towards an Ontario Secondary School Diploma;
- registered in a minimum of one high school credit in their home school; and
- approved by the school Principal.

College Now Program - Semester 1

Building Skills for Success

GE113/JEB4T (College Code/High School Code)

This transformative course will provide you with the practical skills, knowledge and attitudes you need for success in college, your career and your life. In order to maximize your post-secondary experience, you will learn about your personal learning style, how to study effectively, how to take notes, how to manage your time, the importance of effective communication and much more. You will also discover specific abilities and characteristics that will provide you with the opportunity for personal growth and increased well-being. Learn how to maximize your potential with this course!

Photography and Image Editing I

IM116/AFI4T (College Code/High School Code)

You will learn how to express meaning using visual imagery, and how to develop your own personal photography style and techniques. You'll also practice Adobe Photoshop techniques.

Sociology of Community; The Indigenous Context

SY066/NBC4T (College Code/High School Code)

This course will provide students with an introduction to the history of colonization of Indigenous communities in Canada. Contemporary Indigenous community issues within Northwestern Ontario (NWO) and Canada will be examined. Students will explore the unique socio-political relationships between Canada and Indigenous peoples with an emphasis on colonial, legal and political issues. With a broader understanding of the context of colonization, students will analyze contemporary relationships and efforts towards renewed relationships and reconciliation.

Foods of the Americas

GE080/TKL4T (College Code/High School Code)

This course provides a basis for understanding the global impact that resulted from the introduction of indigenous foods from the Americas as well as the cultural impact that colonization had on the lifestyles of the American First Nations peoples.

Introduction to the Trades

TP155/TAP4T (College Code/High School Code)

Trades Studies I is designed to introduce the students to a variety of skilled trades. The students will have the opportunity to spend one third of the semester in each of the following trade areas; carpentry, welding and motive power. This course is recommended for students who are considering a trades, techniques or pre-apprenticeship as a future program. Through a combination of theory and practical experience, the student will gain the background necessary to proceed with further study in a more advanced program.

College Now Program - Semester 2

Building Skills for Success

GE113/JEB4T (College Code/High School Code)

This transformative course will provide you with the practical skills, knowledge and attitudes you need for success in college, your career and your life. In order to maximize your post-secondary experience, you will learn about your personal learning style, how to study effectively, how to take notes, how to manage your time, the importance of effective communication and much more. You will also discover specific abilities and characteristics that will provide you with the opportunity for personal growth and increased well-being. Learn how to maximize your potential with this course!

Baking and Pastry Arts

CU130/TUE4T (College Code/High School Code)

This course will enable the student to demonstrate basic professional baking techniques and a working knowledge of baking fundamentals for a la carte and banquet settings. The course content will cover the mixing methods used to produce yeast breads, quick breads, pies, tarts, doughs, sponge based pastries, custard, creams, choux paste and laminate products.

Introduction to Psychology

PY199/HBB4T (College Code/High School Code)

This course introduces the student to the world of psychology by highlighting human behaviour and mental processes at the individual level. Students will learn why people do and think the way they do from a variety of perspectives and how psychological principles apply to everyday life situations. This introductory course provides a strong foundation for other courses in psychology.

Wellness for Life

AS220/PPI4T (College Code/High School Code)

The physical, emotional, social, intellectual, and spiritual dimensions of health are the focus of this course. Students will be provided with current factual information about a broad range of health-related issues including stress, substance abuse, sexuality, fitness, weight management, environmental concerns, and death and dying. As well, students will be actively involved in examining the impact of lifestyle choices upon their own health status.

Introduction to the Trades

TP155/TAP4T (College Code/High School Code)

Trades Studies I is designed to introduce the students to a variety of skilled trades. The students will have the opportunity to spend one third of the semester in each of the following trade areas; carpentry, welding and motive power. This course is recommended for students who are considering a trades, techniques or pre-apprenticeship as a future program. Through a combination of theory and practical experience, the student will gain the background necessary to proceed with further study in a more advanced program.

Dual credits courses run from 12:30 p.m. - 3:20 p.m. except for Baking and Pastry Arts, which runs from 12:30 p.m. - 4:20 p.m.

Check with Student Services for dates and a current list of available courses.

eLearning

Students may earn Ontario high school credits online through the Lakehead District School Board eLearning Program. Students taking an e-learning course will receive their instruction, assignments and tests online at the eLearning site www.lakeheadschoools.ca/elearning/. Participating students will be given face-to-face initial training on how to use the site and meet their teacher at the start of the semester. These courses meet all curriculum expectations and are taught by fully qualified teachers in one of our three high schools.

- Enjoy the flexibility of an eLearning online course
- Dedicated eLearning teacher contact, support and assistance, including a help desk.
- Computer access available
- Qualify by enrolling in at least two per semester – other day school courses.

Please check with Student Services to confirm the semester when courses will be offered.

Specialist High Skills Majors

Specialist High Skills Majors were developed to give students the opportunity to focus on a specific area of study.

Credit bundles are made up of sector-specific courses. Students acquire skills and knowledge in a hands-on, career-related learning environment with others who have the same goals and career expectations.

- Major credits
- Cooperative education credits (sector-specific)
- Plus additional credits with a focus in the stated discipline

Application and scheduling information is available from your Student Services Guidance Counsellor. Stop in for more information about the focus courses and specialized training students can receive with their SHSM participation.

Arts & Culture | Westgate

For students who are interested in a career in the Arts and Culture sector (music, dance, drama, graphics, design, communication technology, visual art, theatre arts, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. Students will be required to declare a Major area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Aviation & Aerospace | Westgate

For students who are interested in a career in the Aviation and Aerospace sector (aircraft maintenance, aircraft inspection, instrumentation, electrical or avionics mechanics, piloting, air traffic control, flight engineering, mechanical engineering, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Business | Westgate

For students who are interested in a career in the Business sector (trade and commerce, finance and insurance, accounting, real estate, marketing, information technology, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Construction | Hammariskjold

For students who are interested in a career in the Construction sector (carpentry, architecture, construction management, electrical, home renovations, plumbing, structural engineering, home inspection, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Health & Wellness | Superior

For students who are interested in a career in the Health and Wellness sector (child and youth work, Aboriginal early childhood education, fire and police foundations, massage therapy, paramedics, ultrasound, dental, nursing, nutrition sciences, physical therapy, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Hospitality & Tourism | Westgate

This Specialist High Skills Major (SHSM) program is designed for students interested in a career in one of the over 400 hundred occupations in the Hospitality and Tourism sector. Hospitality and Tourism jobs provide plenty of opportunities for advancement, widely transferable skills, and ongoing training.

As part of the Hospitality & Tourism SHSM, you will earn six or more sector specific certifications, earn a minimum of two co-operative education credits, 4 major credits and be involved in experiential learning and reach ahead experiences.

For Hospitality & Tourism SHSM participants, possible careers include:

- apprenticeship – baker, cook, chef, special events coordinator
- college – flight attendant, food service manager
- university – nutritionist, dietician, hotel/resort manager
- entry level workplace – hotel valet, bartender

Justice, Community Safety & Emergency Services | Hammariskjold

For students who are interested in a career in either the First Responder Stream (Canadian Armed Forces, firefighting, paramedics, law enforcement, corrections, border control, and more) or Legal and Administrative Stream (law, bylaws, government, paralegal, policy, administration, and more) this Specialist High Skills Major offers students a solid foundation in the chosen area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Manufacturing | Superior, Westgate

For students who are interested in a career in the Manufacturing sector (metal work, welding, millwrighting, machining, engineering, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.

Transportation Services | Westgate

For students who are interested in a career in the Transportation Services sector (automotive service, heavy duty equipment operation, stationary engineering, electrical engineering, machine operation, and more) this Specialist High Skills Major offers students a solid foundation in the area of study. The SHSM required credits, sector specific cooperative education opportunities, along with specialized sector training and certification are available for students to further expand their learning experiences.
